WordFrequencyTest [Runner: JUnit 4] (0.049 s)

- testExample (0.006 s)
- testInputValidation (0.008 s)
- testGetWordString (0.025 s)
- testCountOccurrencesOfWord (0.006 s)
- testSetWordString (0.003 s)

Failure Trace

org.junit.ComparisonFailure: Get word fail! expected:
at WordFrequencyTest.testGetWordString(WordFreq

```

Word.java
WordFrequencyTest.java
WordFrequency.java

32 System.out.println("\n>>TEST getWordStr method.\n");
33
34 String expected = "abcd";
35 word.setWordStr("abc");
36 String actual = word.getWordStr();
37 Assert.assertEquals("Get word fail!", expected, actual);
38 }
39
40 @Test
41 public void testSetWordString() {
42     System.out.println("\n>>TEST setWordStr method.\n");
43
44     word.setWordStr("I am very happy today");
45     String expected = "I am very happy today";
46     String actual = word.getWordStr();
47     Assert.assertEquals("First set word fail!", expected, actual);
48
49     word.setWordStr("I am very happy today");
50     String expected = "I am very happy today";

```

Outline

WordFrequencyTest

- word: Word
- testExample(): void
- testInputValidation
- testGetWordString
- testSetWordString
- testCountOccurrer

Result Comparison

Expected	Actual
1 abcd	1 abc

testGetWordString(WordFrequencyTest)

OK
